DIKSHA CHHAJED

Mumbai, India

dikshachhajed99@gmail.com | +91 8668689921 | https://www.linkedin.com/in/dikshachhajed/ | https://github.com/dikshachhajed9

PROFILE

Final-year Computer Engineering student and backend engineer specialising in Java, Spring Boot, and microservices architecture. Built production-grade distributed systems featuring event-driven communication (Apache Kafka), OAuth2/Keycloak security, and cloud deployment on AWS. Experienced in designing REST APIs, scalable service architectures, and integrating AI (Google Gemini API) into backend pipelines. Strong foundation in Data Structures & Algorithms, System Design, and Object-Oriented Programming.

EXPERIENCE

Backend Developer Intern — The Lonely Bag May 2025 – Jul 2025 | Remote

Sustainability-focused food tech startup · Python · FastAPI · Agile/Scrum

- Designed and shipped RESTful backend APIs using FastAPI, enabling food tracking and operational workflow automation for a live production platform serving real users.
- Refactored core backend service modules, improving maintainability and enabling independent scalability of critical components.
- Collaborated in 2-week Agile sprints — sprint planning, daily standups, peer code reviews — consistently delivering features on schedule.

PROJECTS

AI-Powered Fitness Microservices Platform *Java · Spring Boot · Kafka · Keycloak · MySQL · Gemini API · AWS*

- Architected a distributed fitness platform with independent microservices (User, Activity, AI Recommendation), achieving full service isolation and independent deployability.
- Integrated Google Gemini API for personalised AI fitness recommendations; designed the prompt engineering layer and structured response parsing pipeline.
- Implemented service discovery via Eureka Server and centralised routing via Spring Cloud API Gateway, enabling zero-downtime service registration.

E-Commerce Backend System *Java · Spring Boot · Hibernate · MySQL · Spring Security · H2*

- Built a full-featured e-commerce backend covering product catalogue, user auth, category management, cart logic, and order processing via clean REST APIs.
- Designed normalised relational schemas and optimised Hibernate ORM queries, eliminating N+1 issues and improving data retrieval efficiency across listing and order endpoints.
- Enforced Spring Security role-based access control, separating admin and customer permission scopes across all endpoints.

EDUCATION

Bachelor of Engineering – Computer Engineering Nov 2022 – Jun 2026

Thadomal Shahani Engineering College, Mumbai | CGPA: 7.5 / 10.0

- **Coursework:** Data Structures & Algorithms, Operating Systems, Computer Networks, DBMS, Software Engineering, AI, OOP

SKILLS

Languages: Java, Python, SQL, JavaScript
Frameworks: Spring Boot, Spring Cloud, Spring Data JPA, Hibernate ORM, Spring Security, FastAPI
System Design: Microservices Architecture, REST API Design, Event-Driven Architecture, API Gateway, Service Discovery
Databases: MySQL, MongoDB, H2 (In-Memory)
Cloud & DevOps: AWS (EC2, S3, IAM, RDS), Docker, CI/CD Pipelines, Git, Maven, Postman

CERTIFICATIONS & ACHIEVEMENTS

- National Entrepreneurship Challenge (NEC'24) – Advanced Track: Selected for Innovation, Business Problem-Solving, and Leadership & Project Management.
- SQL Workshop Certification — Advanced SQL querying, joins, indexing, and schema design.
- Advanced Software Engineering Virtual Experience — Industry-simulated tasks in systems design and code quality.
