Aspiring Software Engineer with a strong foundation in Java, backend development, and data structures. Seeking to leverage my skills and internship experience to contribute to scalable solutions while continuously learning in a growth-focused environment. Currently looking for **full-time opportunities** where I can apply my technical knowledge, problem-solving abilities, and collaborative mindset to build impactful software products.

Education

Thadomal Shahani Engineering College, Mumbai
B.E. in Computer Engineering – Expected May 2026
Cumulative GPA: 7.5 (till 6th sem)
Relevant Coursework: Software Engineering, Operating Systems, Computer Networks, Database Systems, Artificial Intelligence

---

Skills

Programming: Java , SQL,Python,HTML,CSS,Javascript

Frameworks: Spring Boot, Spring Data JPA, Hibernate, Spring Cloud (Eureka Server, API Gateway)

Tools: Apache Kafka, Maven, Git, Keycloak

Databases: MySQL, MongoDB, H2

Core Concepts: Object-Oriented Programming (OOP), Data Structures & Algorithms, DBMS,CN,OS Microservices Architecture.

Projects

AI-Based Fitness Microservices Application

Tech Stack: Java, Spring Boot, Spring Cloud, Microservices, REST APIs, Apache Kafka, OAuth2, Keycloak, MongoDB, MySQL, Google Gemini API

- Developed a **Java-based microservices application** using **Spring Boot** for user management, activity tracking, and AI-driven fitness recommendations.
- Designed and implemented **RESTful APIs** with **service discovery (Eureka Server)** and centralized routing via **Spring Cloud API Gateway**.
- Implemented **asynchronous, event-driven communication** using **Apache Kafka** between Activity and AI Recommendation services
- Integrated **Google Gemini API** for personalized recommendations and secured APIs using **OAuth2 and Keycloak** with token-based authentication.

E-Commerce Backend Application

Tech Stack: Java, Spring Boot, Spring Data JPA, Hibernate, REST APIs, H2, MySQL, Maven

- Developed a **Java-based backend for an e-commerce application** using **Spring Boot** to manage products, categories, users, and orders.
- Implemented **RESTful CRUD APIs** with **request validation and global exception handling** using Spring Boot.
- Designed **JPA entity relationships** (One-to-Many, Many-to-Many) and optimized database operations using **Hibernate**.
- Integrated **H2 for development/testing** and **MySQL for production**, and implemented **pagination and sorting** for efficient data handling.

Work Experience

Backend Developer Intern — The Lonely Bag (Remote)

May 2025 – July 2025

Developed and maintained **backend services using FastAPI** for a sustainability-focused food tech platform.

Implemented **core backend logic** to support food tracking, data processing, and operational workflows.

Collaborated in **Agile development**, participating in stand-ups, sprint planning, and peer code reviews.

Worked closely with **developers and product managers** to translate business requirements into efficient backend solutions.

Improved **performance and scalability** to support initiatives aimed at reducing food waste and environmental impact.

National Entrepreneurship Challenge – Advanced Track

Aug 2024 – Dec 2025

- Completed a 5-month challenge with innovation-focused tasks.
- Built team and leadership skills promoting entrepreneurship

Certifications

- SQL Workshop Certificate
- Cybersecurity Analyst Virtual Experience
- Advanced Software Engineering Simulation
- NEC'24 Advanced Track – Participation
- AI Tools Workshop

Achievements & Extracurriculars

- State-Level Futsal Player
- 98 Percentile in MHT-CET Mathematics
- Led innovation initiatives in college committees
